Green Grass Shop Inventory

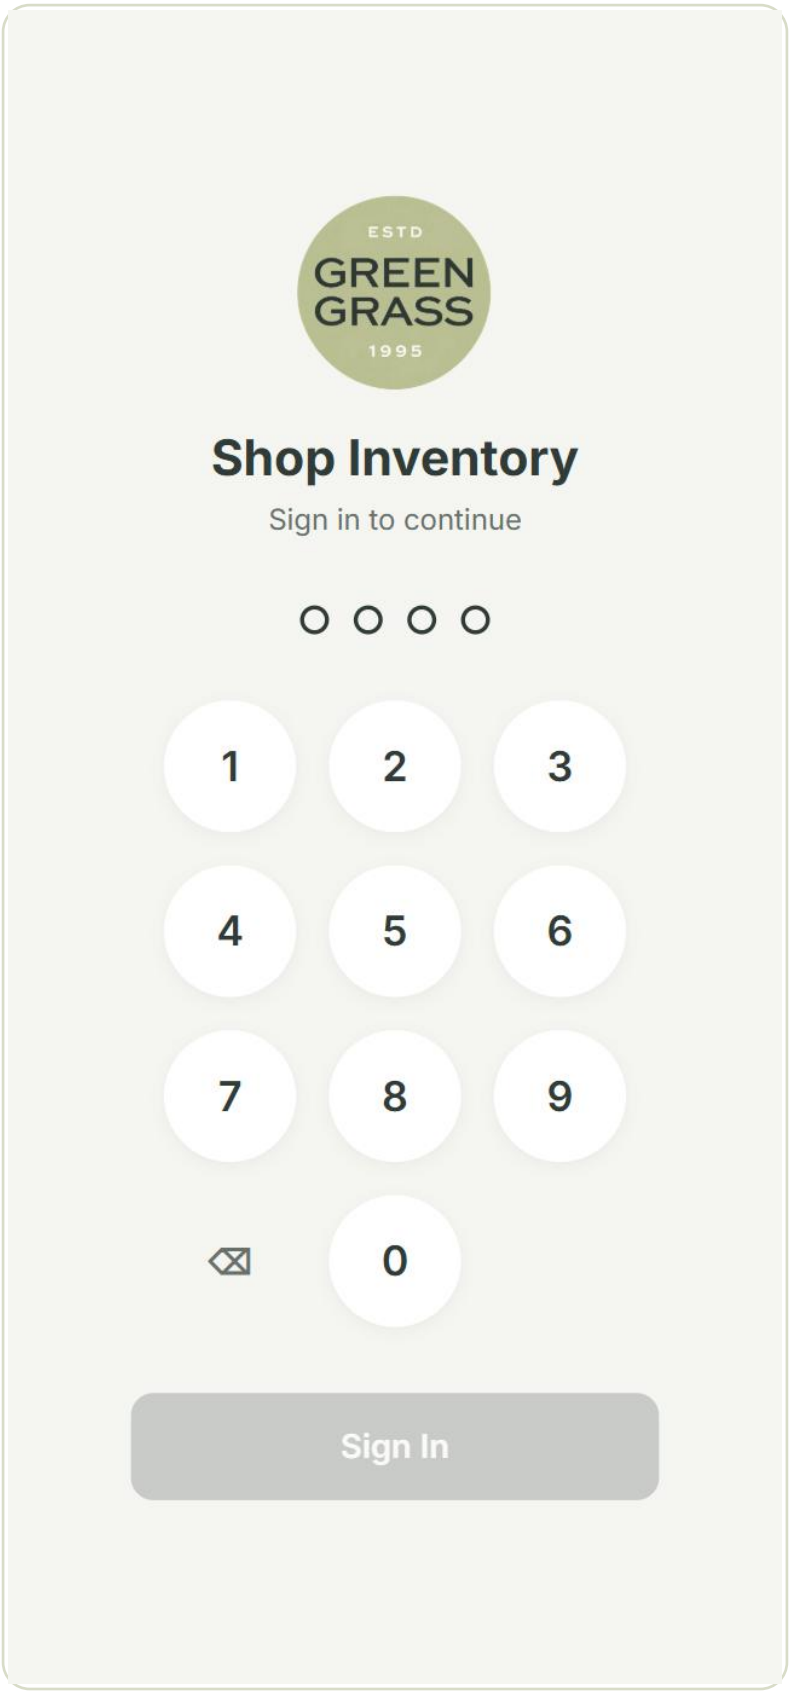

Prototype Walkthrough

A mobile-first inventory app for tracking tools, consumables and trailers — installed to the home screen on iPhone/iPad, no app store required.

October 14, 2026

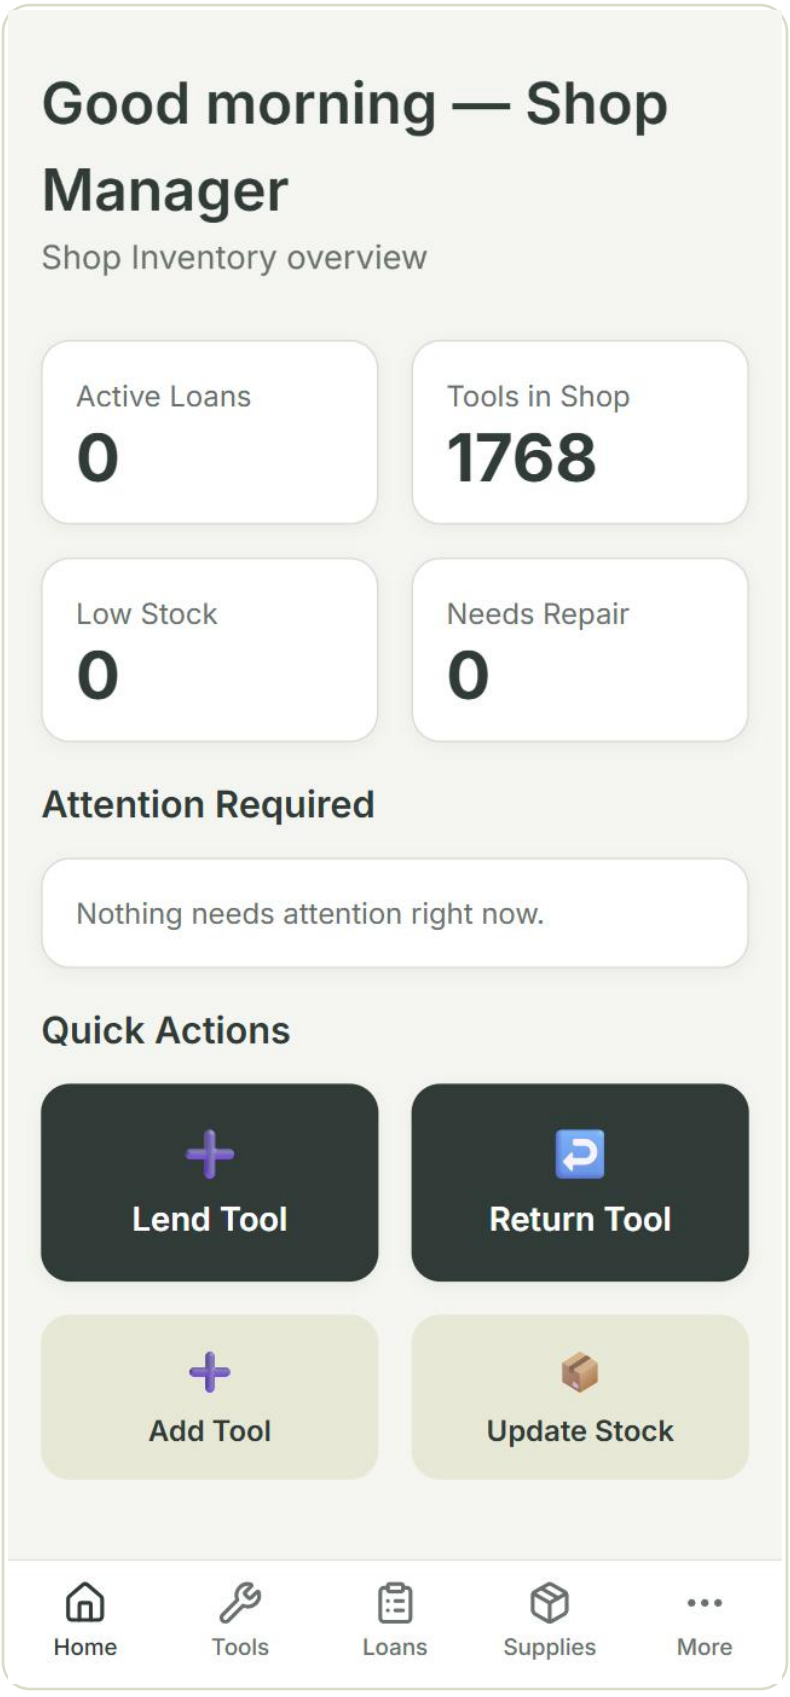

Sign In

PIN-based login — each shop manager has their own 4-digit PIN. No passwords to remember on a shared shop tablet or phone.

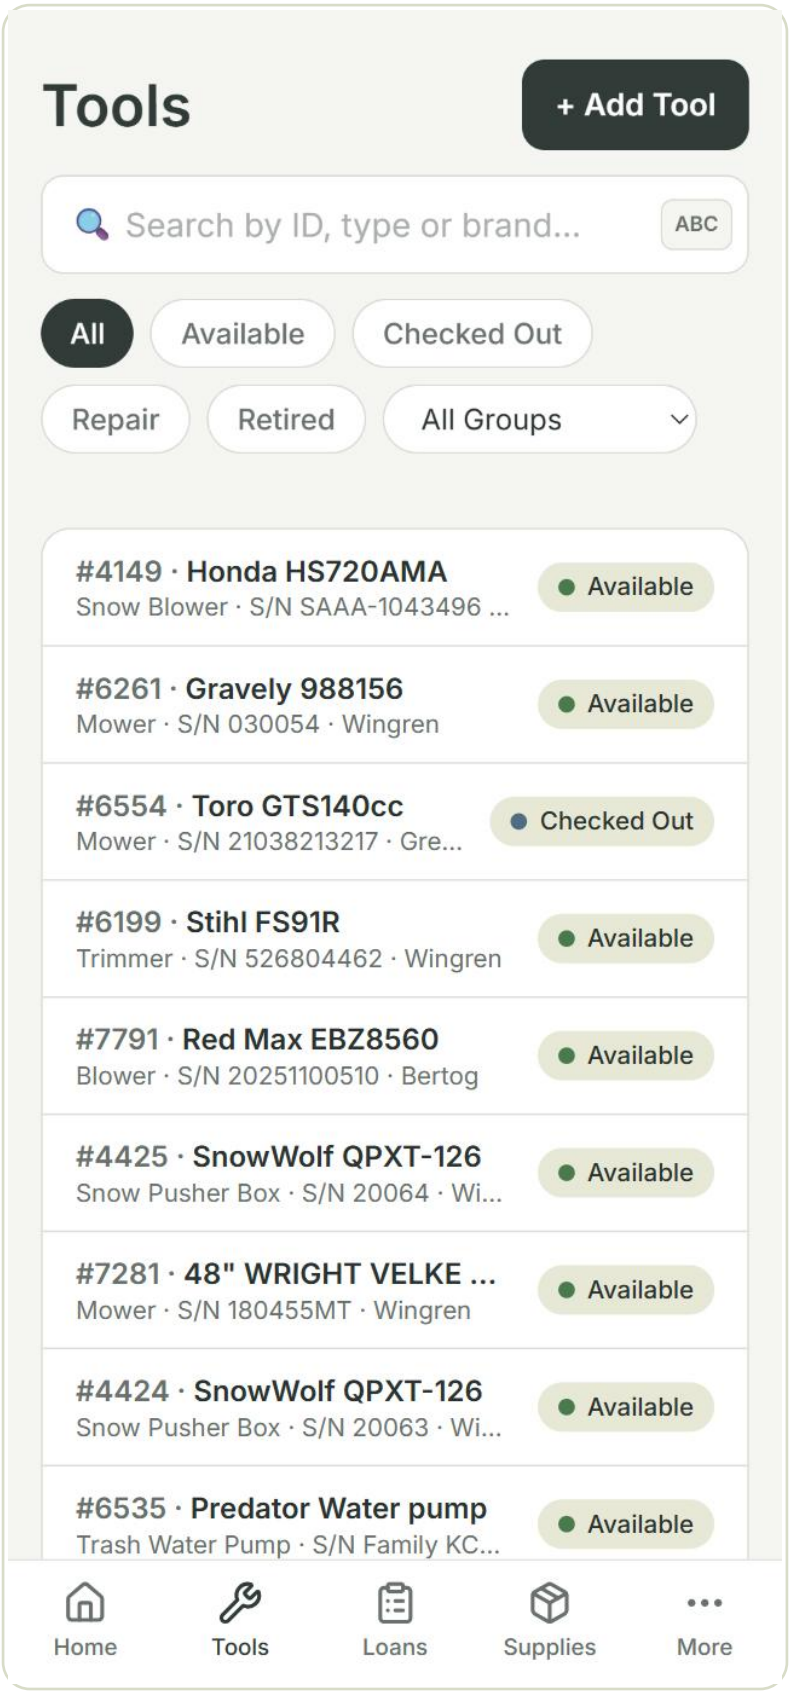

Dashboard

At-a-glance overview on open: active loans, tools in the shop, low-stock supplies, and anything needing attention, plus one-tap shortcuts for the most common actions.

Tools Catalog

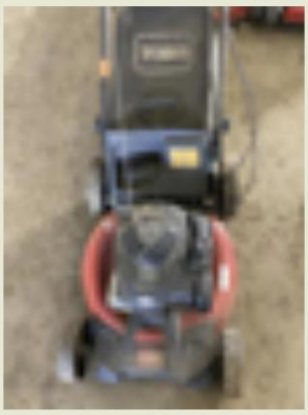

All 1,900+ tools and machines, searchable by ID, type or brand, filterable by status and group. Built to stay fast and light even at this scale.

Tool Detail

Full record for a single tool — photo, assignment, group, location, status and serial number.

← Back

Toro GTS140cc

Checked Out

#6554 · Mower

Synced from Trellis — read only. Status and data update from there; they're not edited here.

Assigned to

Domingo Perez

Direct assignment — for tools that didn't come through a Lend Tool checkout (e.g. synced from Trellis). Changing it here doesn't create a Loan record.

Loans

Every checkout/return passes through here, with quick access to Lend and Return.

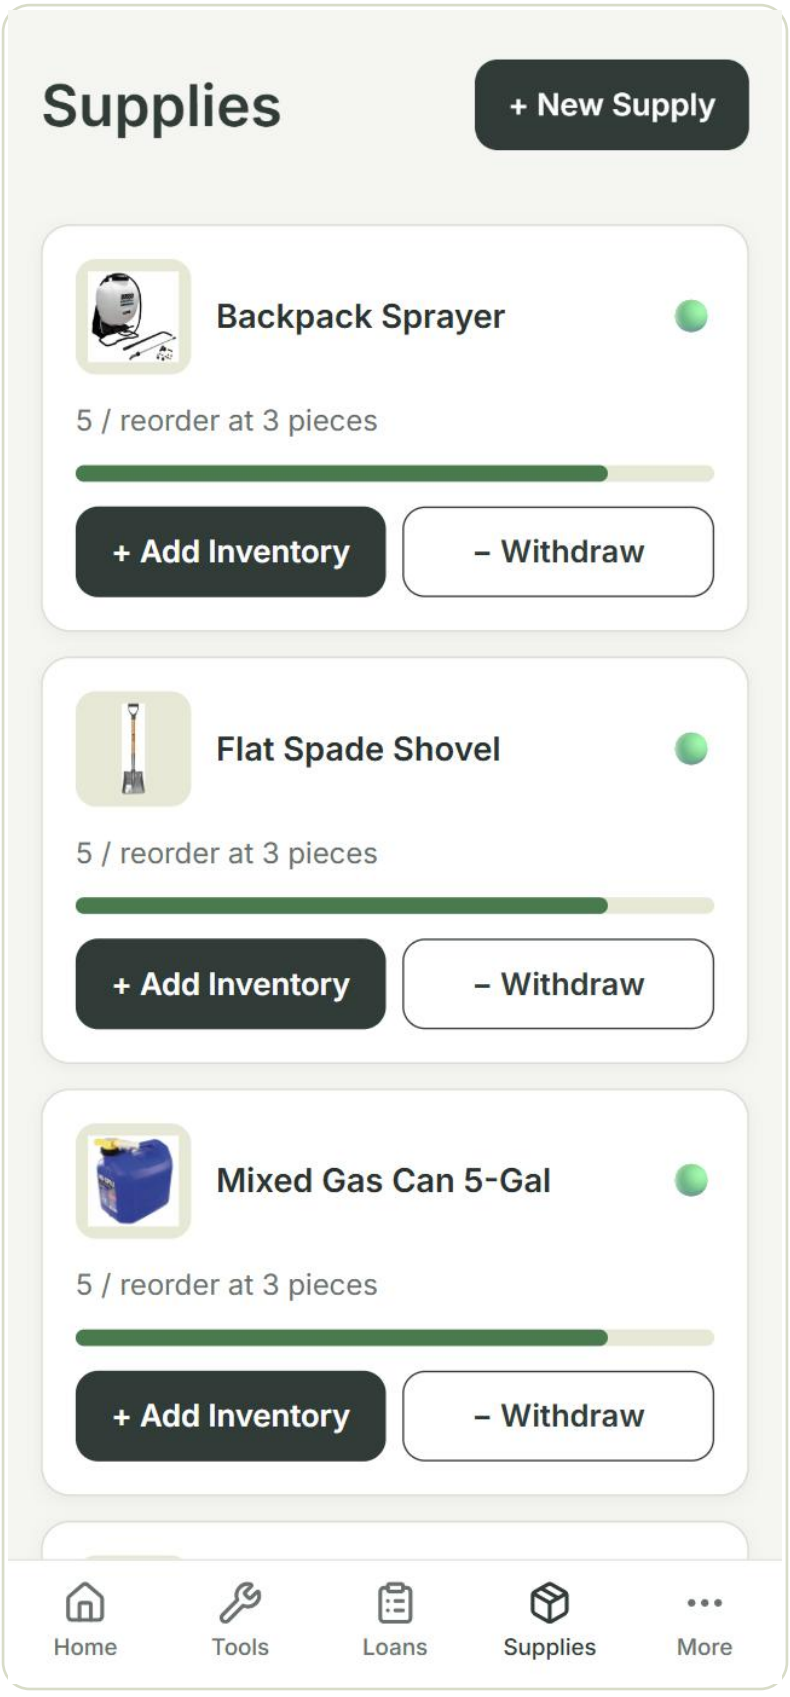

Lend Tool

A guided, step-by-step checkout flow: pick the tool, the employee, the condition, and an expected return date — so staff always know what's out and when it's due back.

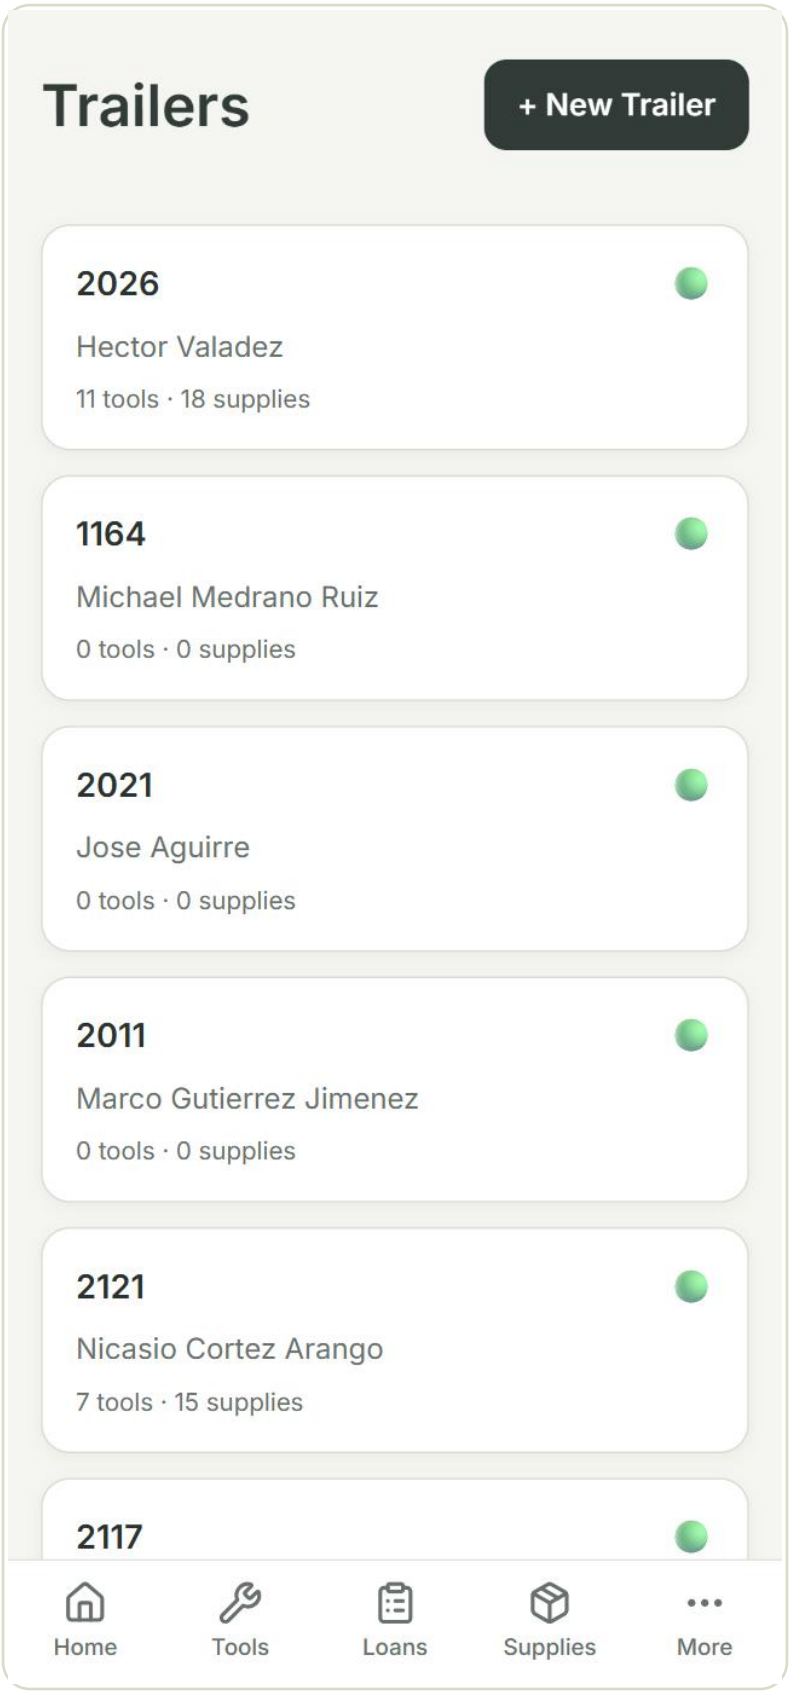

Supplies

Consumables with live stock levels and reorder thresholds. Withdrawals now require picking the employee taking the item, so usage can be traced back to a person.

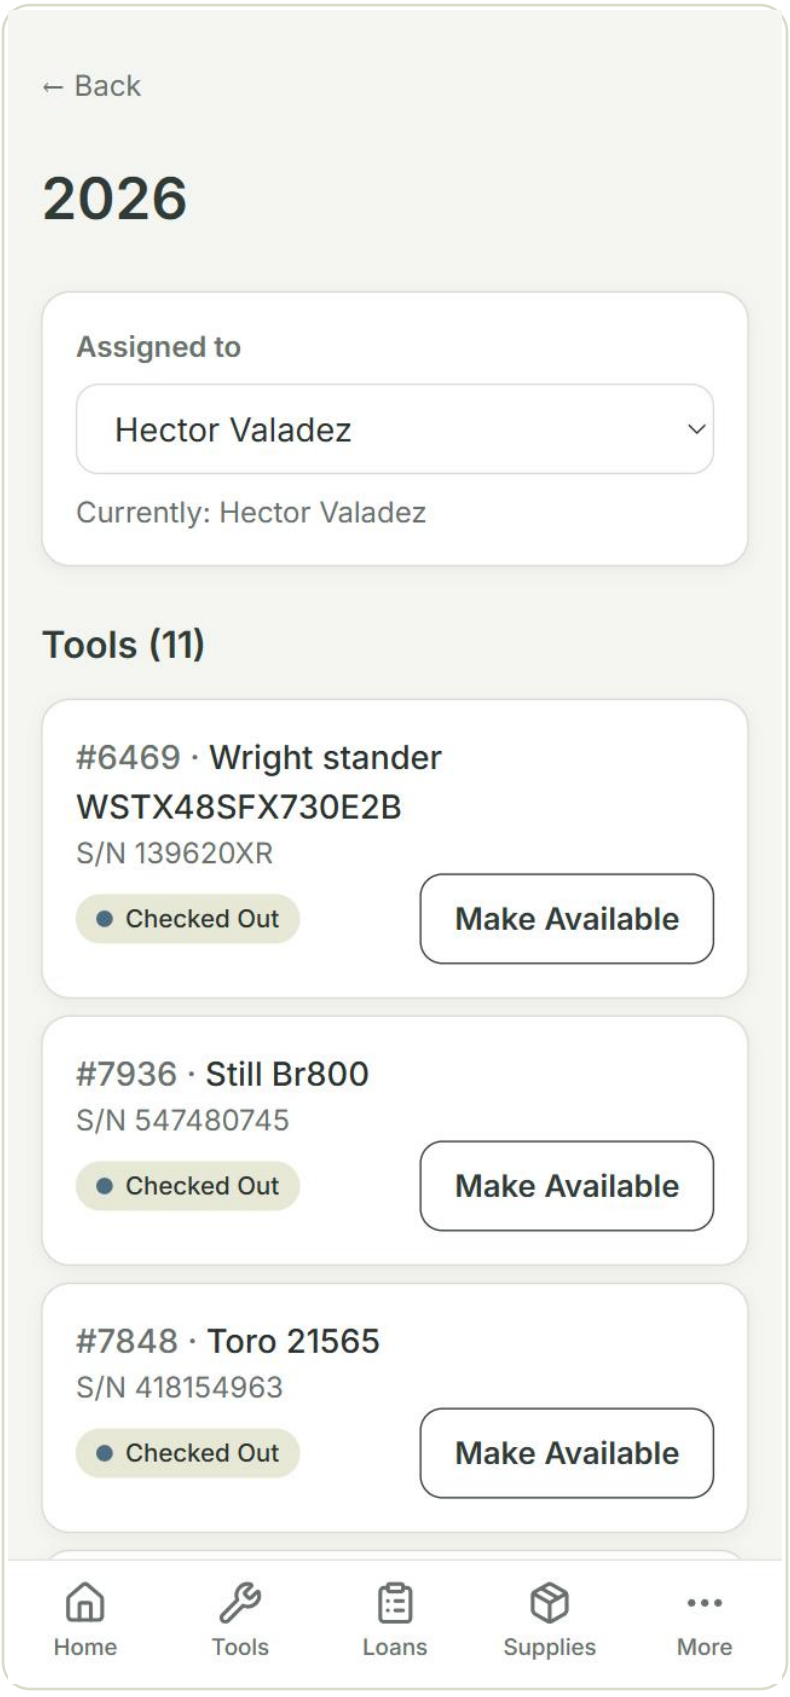

Trailers

Every trailer, who it's assigned to, and how many tools and supplies it's carrying — derived live so it can never drift out of sync.

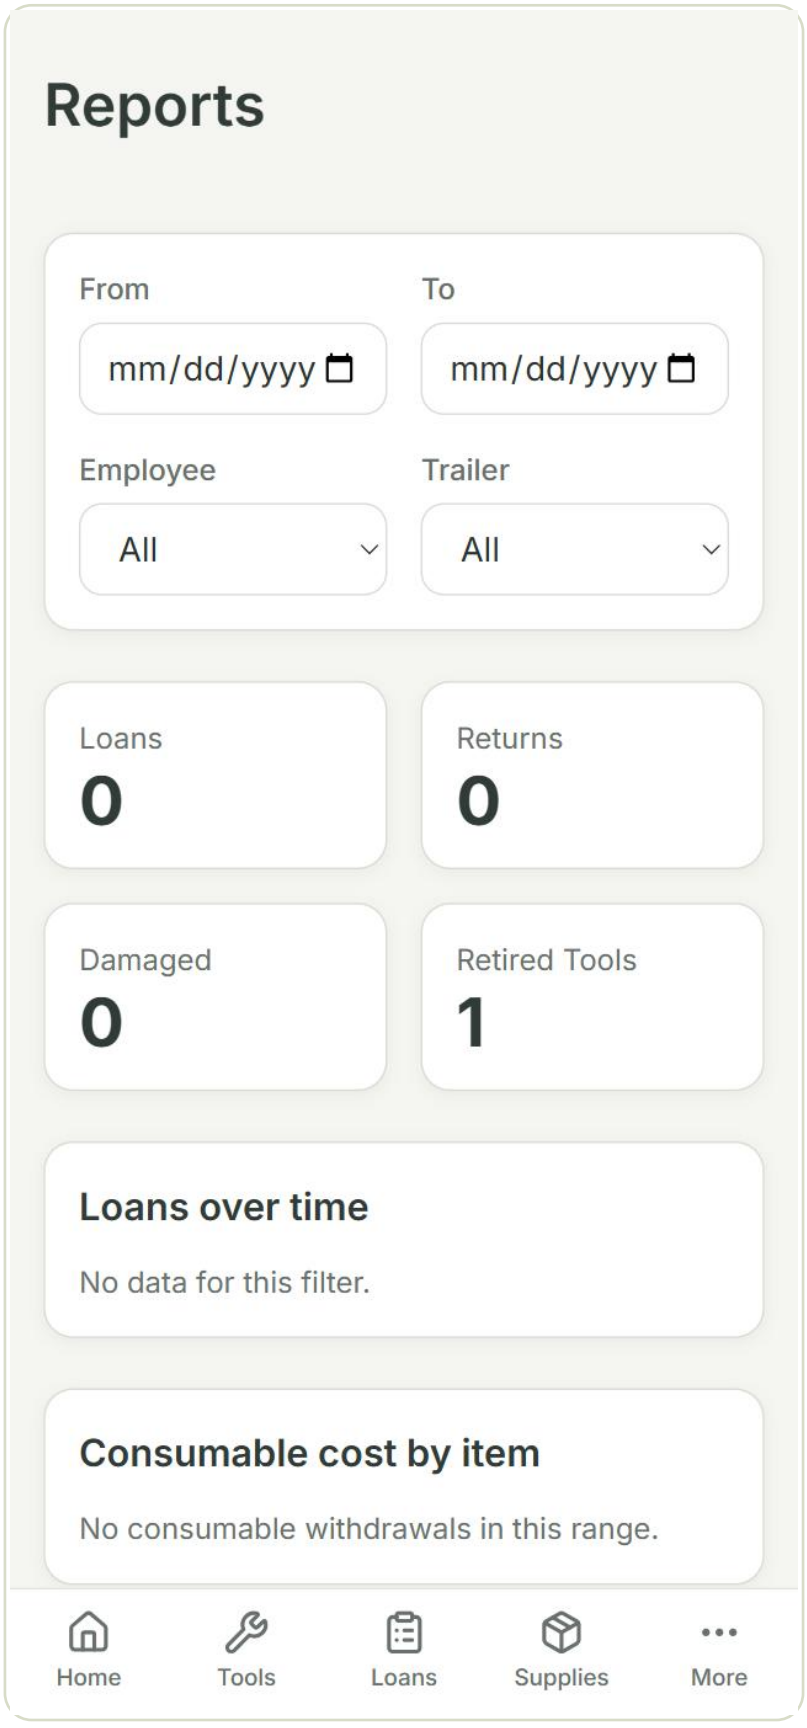

Trailer Detail

Drill into one trailer: assigned worker, the tools currently checked out to them, and the full supply loadout for that trailer.

Reports

Filterable by date range, employee or trailer: loan volume, returns, damage, and retired tools at a glance.

Reports — Usage Insights

Consumable cost by item, who's consuming the most, and total inventory value — so the shop can spot patterns, not just totals.
